HeluVin

The following Latin and Greek alphabetic misunderstanding of phonemes in the name of „KoloVeni“ the Germans word KoloVeni write: SlaWen.

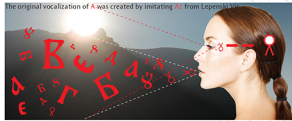

Slavia

4-1 8 7 6 5

The term „ViniKolo“ (ikavian variant of the word „KoloVeni“ from the XI century BC) from the city of Sand written in AzBuka (Cyrillic AlphaBet) letters Lydian epochs (numbered 5, 6, 7, 8), and ideographic symbol (numbered 4-1 for comparison with the Bruskan inscription “Kolo”).

Explanation: Bozidar Mitrovic - How word SlaVs originated from the word KoloVeni!

The original vocalization of A was created by imitating Az from Lepenski Vir. The word culture came from the old Russian word KOLO, which was transformed into KVLV then to CVLT / Cult / cult. Even in Latin, it is preserved that the word culture came from the word (cult) COLO / Kolo. The most ancient view (worldview) of the ancient Slavs / SloVeni, who called themselves KoloVeni, was brilliantly simple - „Everything is Kolo.“ The ancient Slavs under the process „Kolo“ meant the rotational unity of the movement of the Earth (around the Sun), nature and man. They noticed that this Kolo of reciprocity of cyclic movement materializes itself on the cut of a tree in the form of a year (annual (GOD) rings) and on the fingers of a person (in the form of papillary circles), and this enabled them to specify in Lepensky Vir the year as the time of the resurrection of nature. Thanks to this brilliantly simple worldview, they systematized KoloDar (secret knowledge that we call today: CalenDar) and could switch from a nomadic to a settled way of life (which is the beginning of the culture), because they realized when it is possible to plant cereal seed in furrows and to collect the crop in the same place. Therefore, in the world, the first houses of (dVine/GOD) tree and wheat were found in Vinca, whose name was Race / rAs (race of Origin). And the Origin for them was precisely Kolo (the cross of the Sun, the cross of the Earth, the cross of the Moon)
